

The Monthly Observations

for April 2022

Welcome to Psychic & Energy Work's *Observations* for "April 2022". **The narrative below profiles this month through spiritual, energetic and numerological filters. It can be useful reading it together with the forecast for this year.** It aims to help you learn about and work with dynamics true(-r) to self. Implicit in this is intuition; how you're processing invisible stuff. Insights about the collective chart can really help us make sense of things. No matter our personal year or placement, what happens outside affects self too.

Recapping last month...

"March"s dynamics seemed to stretch mindset over again. That's a no brainer given what's been happening out there. News cycles prompted reviews of what self was sitting in. **That's always an interesting dynamic: is creation shaped alone by our decisions? To a degree, very much. Beyond that, we're a part of a much bigger picture.** Receiving is key in manifesting in spiritual, physical and intuitive terms. What feels right doesn't only source from person/people. We're partners as well as painters no matter the landscape we're in.

Last month brought "9"s and, with that, slower flow on some levels. This number wants folk stopping and sorting. It buys people time to clear, clean, process. Doing this helps us discover/sense where to now. This can unfold as shifts we enjoy but the universe sometimes send more: events that seek fundamental change. **Illness, cash flow, conflict encourage self to review how it's performing and whether life is as good as it can be.** Via such rhythms, portals open to clearer, stronger, wiser zones. We don't always run with the optimum choice yet, through this, we consciously learn.

I hope your last month wasn't jarring. For many, it was. "7"s appeared in "March"s profile. They seek (more) spiritual intelligence. Wisdom flows best when we release mind. "Release" doesn't mean discarding or dismissing. It points to self divesting limit, bias, grip, resistance, greed. Over-mindful "7" heightens projections; it believes, judges, knows too much. Living in past is amplified by this number. We're receiving beings not just do'ers or managers. **Petrol in shapes next moments. Taking time to process maintains health. All of this affects manifesting; what we attract; how things unfold.**

“APRIL”S NUMBERS

Every month brings its own dynamics which interact with the year's chart. Outlined below are “April”s key numbers followed by my *Observations*.

This Month's Chart

	<u>each year</u>	<u>in 2022</u>
Birth Number - what we're here to be/become & exemplify again	4	2026/1
M.O. - how we're likely to arrive at that point	29/2	121/4
Reality Number - the spiritual result(s) of doing such things	33/6	2147/5

“April 2022”s numerological tally....

Combined with the year's numerological profile, this month produces the following count. **Examining a chart from this angle helps us understand what's going on. It doesn't, in itself, signal “good” or “bad” (life often delivers a mix).** What we find initially jarring comes to promote better states of being. A count like this can help us make sense of what we need to. When a number presents three or more times, its energetic and spiritual themes (and lessons!) increase.

The tally for this month is:

Number	0	1	2	3	4	5	6	7	8	9
Frequency	2	6	12	2	4	1	3	1	1	2

Let's look at what this might mean for your world.....

“April”s birth numbers are “4” and “2026/1”

awareness, focus, resilience matter

“4” and “1” are interesting goalposts. They want self knowing and backing its course – i.e. from a spiritual angle rather than needy or limited ones. “2026” passes through “10” as it reduces to single digit. **Self discovery can feature (more); our trust in and embrace of gut feel. Life always guides intuitively well. Mental dynamics interfere with this.** Mind's always searching for gaps and next moments which is a strength when in balance. Egoic “1”, however, zones in on flaws, gaps, lack regularly. When we connect to divine wisdom, real world gaps start filling.

"4" stretches perspectives wider even when self has good, long sight. "1" suggests louder themes around this, this month. It highlights more of self's strengths so that they're backed and channelled constantly. "4" is "build"; hence, the question: "what are you helping to exist?" **Like all vibes, it wants us evolving; life is constantly calling sense up. When people seek soul and guidance, Source says "okay, you asked for it".** We don't always sign up for how things unfold yet goodness emerges, ultimately, from all things. This is not to dismiss the trauma emerging from conflict. Through troughs self is led back to summit. Hard to sense and swallow when life's harsh. Yet, self is a partner in creation. "4", being "build", flags models, methods, assumptions... It, therefore, seeks upgrade and health check: are current offerings as best can be? Don't be surprised if "April" shows you (or others) how to live more spiritually.

"2026" could boost what has been outlined above. "202" asks us to dance with life wholistically, constant. Withdrawing helps folk make sense of things. "0" also flags spiritual connection. Are you tending to things as you can/should? Creating best physically? **Half-cut in means half-cut out. Lower level energies roll until they're realigned. Perfection grows only when it is offered, valued, nurtured. We each create in our own way. Here, too, birth lessons about model.** Are you truly living your path? We're here to intuitively lead, allow, follow. "6" wants self at genuine best. Authenticity, this month, could be sought, tapped into, more. Being real is a continual dare. Being your zenith is all you can aim for.

Mind can overstate its standards. Breath and time out helps that clear. "4" and "2026/1" offer new chances to know/discover self then be. That might mean you; it could involve others. We often learn via outside world. **Witnessing is a potent stance and tactic. We tend to heal most when we don't fill our landscape with ourselves. "1" says "back your horse to the fullest". That needn't breed belligerence.** We're here to share. Egoic self forgets that. The universe guides via positives and negatives. Remember: you're here to choose (not just follow) even when you seem to have a lesser hand. We first need to know what states we're seeking. Just doing this affects how future plays out.

Breath, exercise and technology-free time out promote success that is long-term. Embrace life for universal sake. "1" also flags example. Where can you stand firmer in the present? Spiritually, that includes everyone/thing. **Good elders listen, process, observe; discern between want v need. Life asks us all to do this often. We forget it at times and start seeing life as landscape to rule.** None of these words need to trigger lack of interest. "1" flags how everyone is different. Where can you back your uniqueness? Know you are here to receive, promote, create. We only doubt success when we become wrapped up and driven by egoic vibrations. That's just part of being human but everything starts on the energetic level.

Life is a great communicator. It's always revealing newness to rejoice in. Only egoic self withholds, excludes, practically jokes, forgets about integrity. Where can you stretch your sense that life's okay AND radiate that? **Depth, grounding, practice, care.... could heighten as themes, this "April". Here, they'll show us more about how and where progress can birth.** The Aquarian age – which we're in now – seeks newness that's full(-er) of substance; not so much bling, greed, exclusion. So much is being revamped. Don't fight with life. That wastes energy. The universe has time on its side. Don't let horizontal dynamics rule your thoughts or situations. Connect to soul to partner fully. The stance of observer is potent.

My Clearing Cards[®] help you connect

This month delivers M.O.s of "29/2" and "121/4"

time to discover what self's made of again

The M.O. describes how we'll evolve as a period unfolds. It's via the "how"s that we become more aware of how to live as soul. "29" hints that such themes could abound as "April" visits. Its movement through "11" on its way to "2" guarantees this. **"11" is double leader, example; truth as a stretch into wider perspective. Big picture moments can stop us in our tracks when they first emerge.** A master number, this vibe denotes truth that's channelled; authenticity. Through this, we learn more about placement, sharing space, relating healthily ("2"). We also attend to whatever requires clarity or balance ("9"). "29/2" wants things sorted wherever they're needing an overhaul.

"29" can also highlight where compassion's needed to the next degree. To others, self, nature and globe, we're certainly seeing such opportunities. In one sense, we're just leaving chapters when self focus was all the rage. There's nothing wrong with that in balance but pendulums swing beyond centre. Every gesture invites a reaction. Magnify that if it's mainstream. Me-ness has been a louder success drive since the turn of this century. That needn't be shunned or devalued. Self-focus is part of waking up yet everything thrives when it's in balance. **Self first gets theory then grows into practice. Soul's only drowned when one self counts more. Marketing worlds are up for adjustment. With that, all systems which drive and support them, including us.** The placement we give certain aspects is evolving. It's part of the decade "2020". "1" – self as centre – is being reconfigured as a theme. Beyond "2019", its role in flow has shifted. That is why issues are pulling focus outwards. This needn't see self repressed in value. It's here to do an important job. Life wants universal awareness. Self still features in that equation. So does success, flow, health. Yet how we reach those milestones just requires different mindsets. We all know this as a theory. It's not new news in any way. Life is now seeking it as a practical dynamic. Spiritual being is part of this wavelength.

Essential "me" often goes public having just passed through spiritual fire. "121/4" could boost what has been outlined above. It wants people learning more about self as a wavelength and state - mine, yours, others' as well - through the dance between self-other-self. "4" – awareness - is due to expand. **The universe is always trying to show us more about what matters and what, therefore, needs our support. "4" wants quality frameworks, constructs, forward movement. Those standards move all of the time. Life is a stairway not straight, flat road.** We don't have to climb onwards and upwards but soul comes calling sooner or later. "29/2" and "121/4" as M.O.s could help you clarify purpose, place, value, role. All in all, "April"s birth numbers and M.O.s point to healthy progress.

So? Don't be surprised if this month guides you consciously forward again. The first quarter of "2022" pulled focus in, back to basics. **This month could see selves feeling as if they're able to step towards future again. "4" can unfold like a tsunami. Eastern Australia has had its share of that.** Wipe outs on any level can feature when this number visits in force. Four "4"s; three master

numbers; and a "5" reality could help people prepare to get going. "4" marks model and assumption, hinting that it's time to confirm strategy. In one sense, we're still focused on the basics. Great ventures birth from platforms laid spiritually.

clearings, healings & meditations over video or phone

... not to mention readings and other forms of energy work. Life can present in ways that stun, often just as we need to stay grounded. **Via phone, video or email, I tune in to help you understand and clear.** Sessions are recorded so that you can revisit the guidance you're given.

"April's reality numbers are "33/6" and "2147/5"

balance, adventure and meaningful growth

"April" always brings "33" as an end point. That number points to realising stuff. It also denotes the role of expression in creating. "Communicate!" is its catchcry - to yourself, others, life, Source. **We manifest optimally when we live intuitively. Take time to process; distil what's inside.** Dedicate a time, every week, to release all busyness and action. Come back to quiet regularly. Such things are key in receiving guidance that's balanced and beneficial. Taking care of everything matters but, long term, has to start with self.

"3" is also "go with the flow". Let life inform you as it now can. We forget that Source is constantly trying to guide us all to our aims. This doesn't only include mental, physical, material spheres. It wants the whole of a person included in any success that's reached. This can explain why nothing is constant; why self's always nudged towards next best. **We are, in this sense, rather like a circle - 360°, not just one aspect. The all of self is what Source aims for. You might know it and think it but has it birthed as completeness?** Every next second wants things to get righter even if they already seemed perfect. This month could highlight next dimension fuller, more complete, somehow. That can mean wonderful adventures. Dare to be the you you sense you really are.

The joy of "6" as reality number is its focus upon care, calm and peace. That augers well for millions of people, let alone planet. **"6" can play out as more supportive rhythms. It's often when cotton wool returns – more padding, kindness, flow, recognition. People can find life more inclusive and helpful.** In and for every individual, "6" wants more realness, genuine "I". We can connect with soul anew. Where, do you sense, might this happen in your world? Numbers highlight self's journey onwards and the stuff we'll be asked to witness. As "6" also flags kindness and balance, "April" could trigger healing experiences.

Along with "6" comes "5", however: new excuses to stretch and test. This number hints at people moving to the next level – forced or not – in conscious ways. "5" can flag new, great adventures; time to try; embrace unknown. As a vibe, it denotes potential; a phase that reveals what we are now ready for. **"5", as dynamic, can stretch and pull in ways we first reject. Self gets used to how life happens. This number comes to vet and test that. In so doing, it helps us open/link to new paths and doors.** "5" is Source saying "you can do it" no matter what "it" involves. All of these vibes signal

a month that will spur realignment, wider landscapes, new starts, growth. That could present simply as perceptual shift. Do what you can to help these dynamics flow.

In closing, this month's master numbers should nudge us into firmer, spiritual, whole world views. Implicit in this is energetic practice; are you making time to process, heal, chill? Such gestures open self up for insights. They only come to help us succeed. **"6" can also stir emotions. Get in touch with core. Release what feels stuck, old, empty. Energy doesn't like a vacuum. What are you letting fill, steer, surround you?** Use this month to come back to balance with methods, goals, values, needs. This will ensure that what comes next is as good as you can birth. All in all, "April" should help you step positively forward in potent terms.

What about your chart?

We each have a specific numerological profile that stems from our date of birth, full birth name and last birthday. I've outlined the collective rhythms for this month but have not talked about your **personal** chart. **Readings that merge numbers with intuitive downloads can help you transition through all sorts of things.** They're all about soul - linking to and channelling it more - and what can occur when we do this.
